Thank you Mark,

I am presently planning to convene at the site with EPA contractor and DOE RAP team support at 1:00 pm tomorrow, assuming that we have successfully arranged for temporary relocation of the tenants. The first task would be to survey out the tenants, their animals and any necessary belongings they must take (and probably their vehicle) prior to taking control of the property and initiating the temporary relocation.

Subject: DEQ Request for Assistance

Greg,

DEQ requests EPA assistance in performing a site investigation of James Findlay's apartment (Renaissance Apts.) and other potential sites which may contain hazardous waste and/or radiological materials. DOE Radiological Assistance Program from Idaho has indicated their willingness to support your site investigation and we recommend using their resources. Also, Brian Gaber would like to be a part of the planning team in order to close out his investigation.

Please let me know how DEQ can best support your effort.

Respectfully,

Mark
